

WHAT CAN YOU DO WITH 200 STUDIES OF LANGUAGE CHANGE?

**Terttu Nevalainen, Tanja Säily, Turo Vartiainen
and Joonas Kesäniemi**

with Jeffrey Lijffijt, Agata Dominowska and Aatu Liimatta

REASSESSING LANGUAGE CHANGE PROJECT

- Lack of access to data & previous corpus-based research
→ research on real-time change largely not cumulative
- **Language Change Database**: Comparative, real-time baseline data for modelling change in progress
 - Open-access **linked data** web application, easy to **edit & query**
 - Currently in beta stage, c. 200 entries
 - Could be used to carry out **meta-analyses** of a large number of linguistic changes

WHAT THE DATABASE WILL CONTAIN

- Metadata, e.g.
 - Bibliographical details
 - Linguistic items & topics studied
 - Corpora & time periods studied
- Data
 - Tables
 - Summary of results

Summary of results

- The subordinator and preposition EXCEPT first appears in 15th-century texts.
- The connective was obviously borrowed from Latin; the verb EXCEPT appears roughly at the same time as the grammaticalized form.
- In the course of centuries, EXCEPT becomes more popular than SAVE but is superseded by UNLESS in subordinator use.
- It is used mostly in statutes and official correspondence.
- It's first appearance as a connective can be traced back to LME

CASE STUDY: RISSANEN & CONNECTIVES

Punctuated equilibria?

HISTORY OF ENGLISH AS PUNCTUATED EQUILIBRIA

(Bergs 2005: 54)

HISTORY OF ENGLISH AS PUNCTUATED EQUILIBRIA

(Bergs 2005: 54)

RISSANEN'S STUDIES ON CONNECTIVES

Grammaticalization / first appearance as a connective:

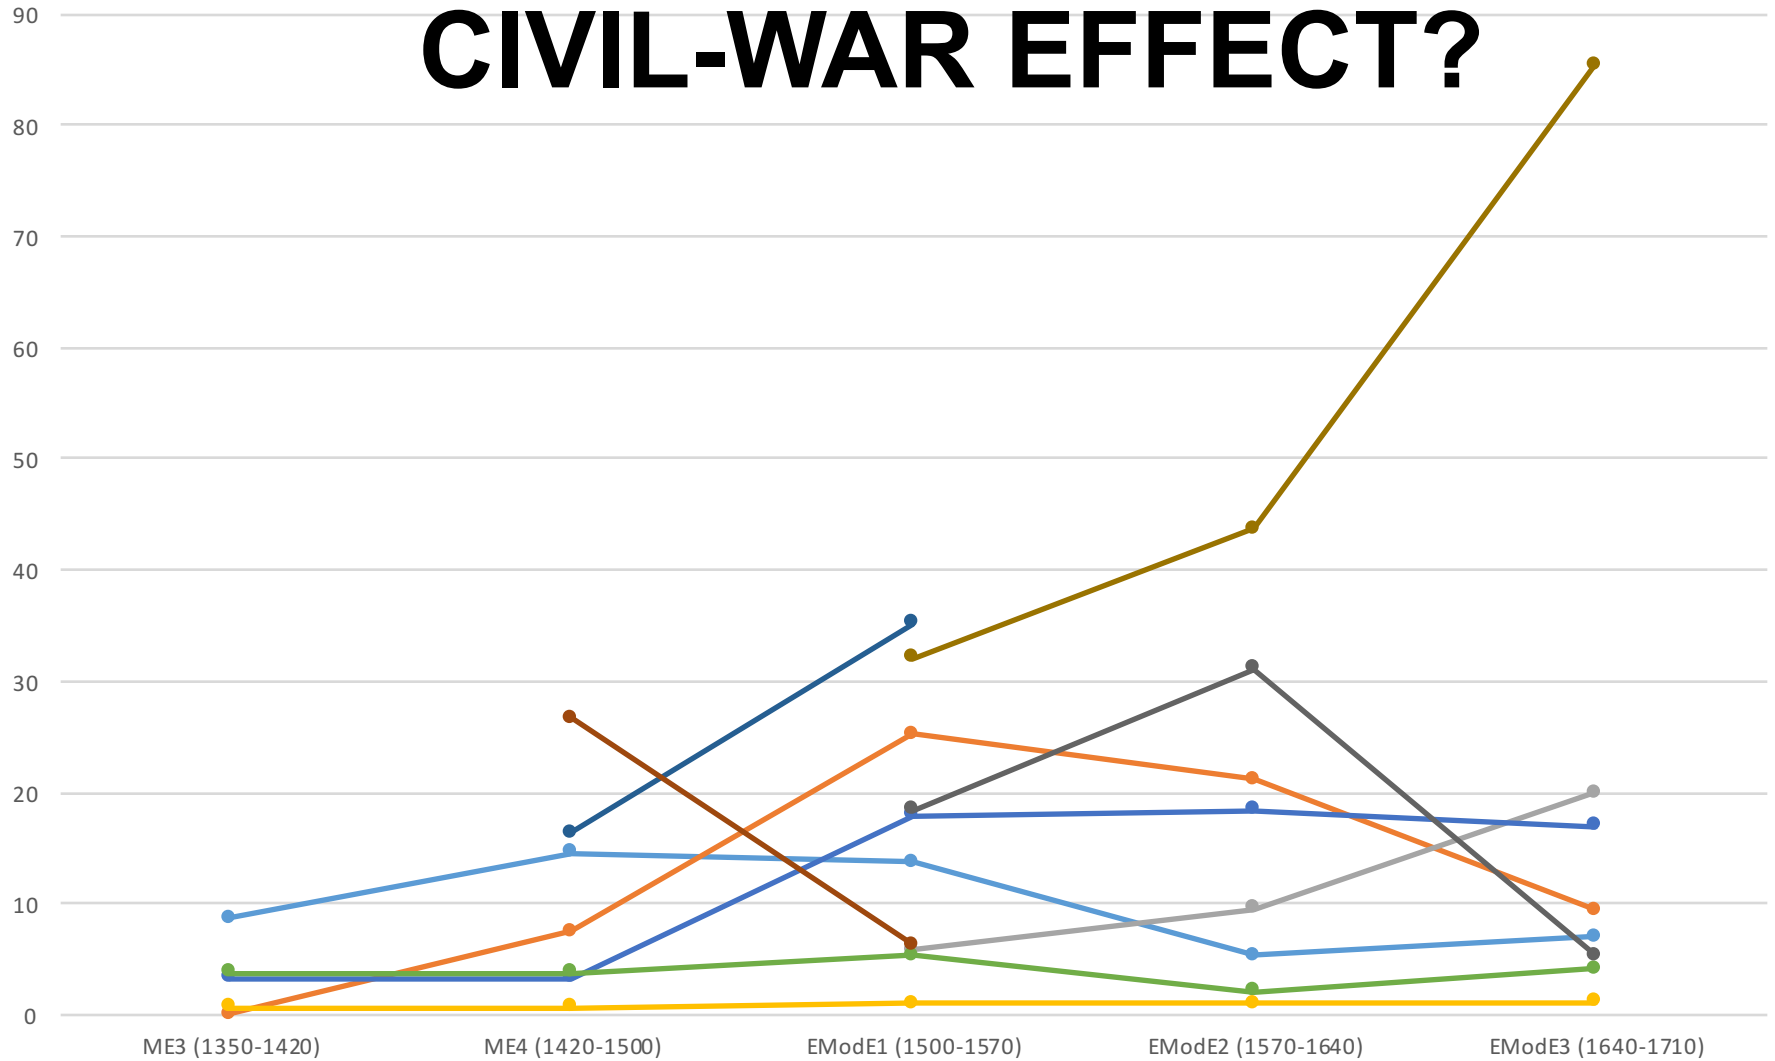

- Old English (or earlier)
 - *without, but, op, till, lest, þe/þæt*
- Middle English
 - *until, that*
- **Late Middle English** (C14–15) – punctuation?
 - *except, in case, because, save, unless, notwithstanding, outtaken, according, provided that, despite, seeing, considering*

Some English connectives in the Helsinki Corpus, 1350–1710

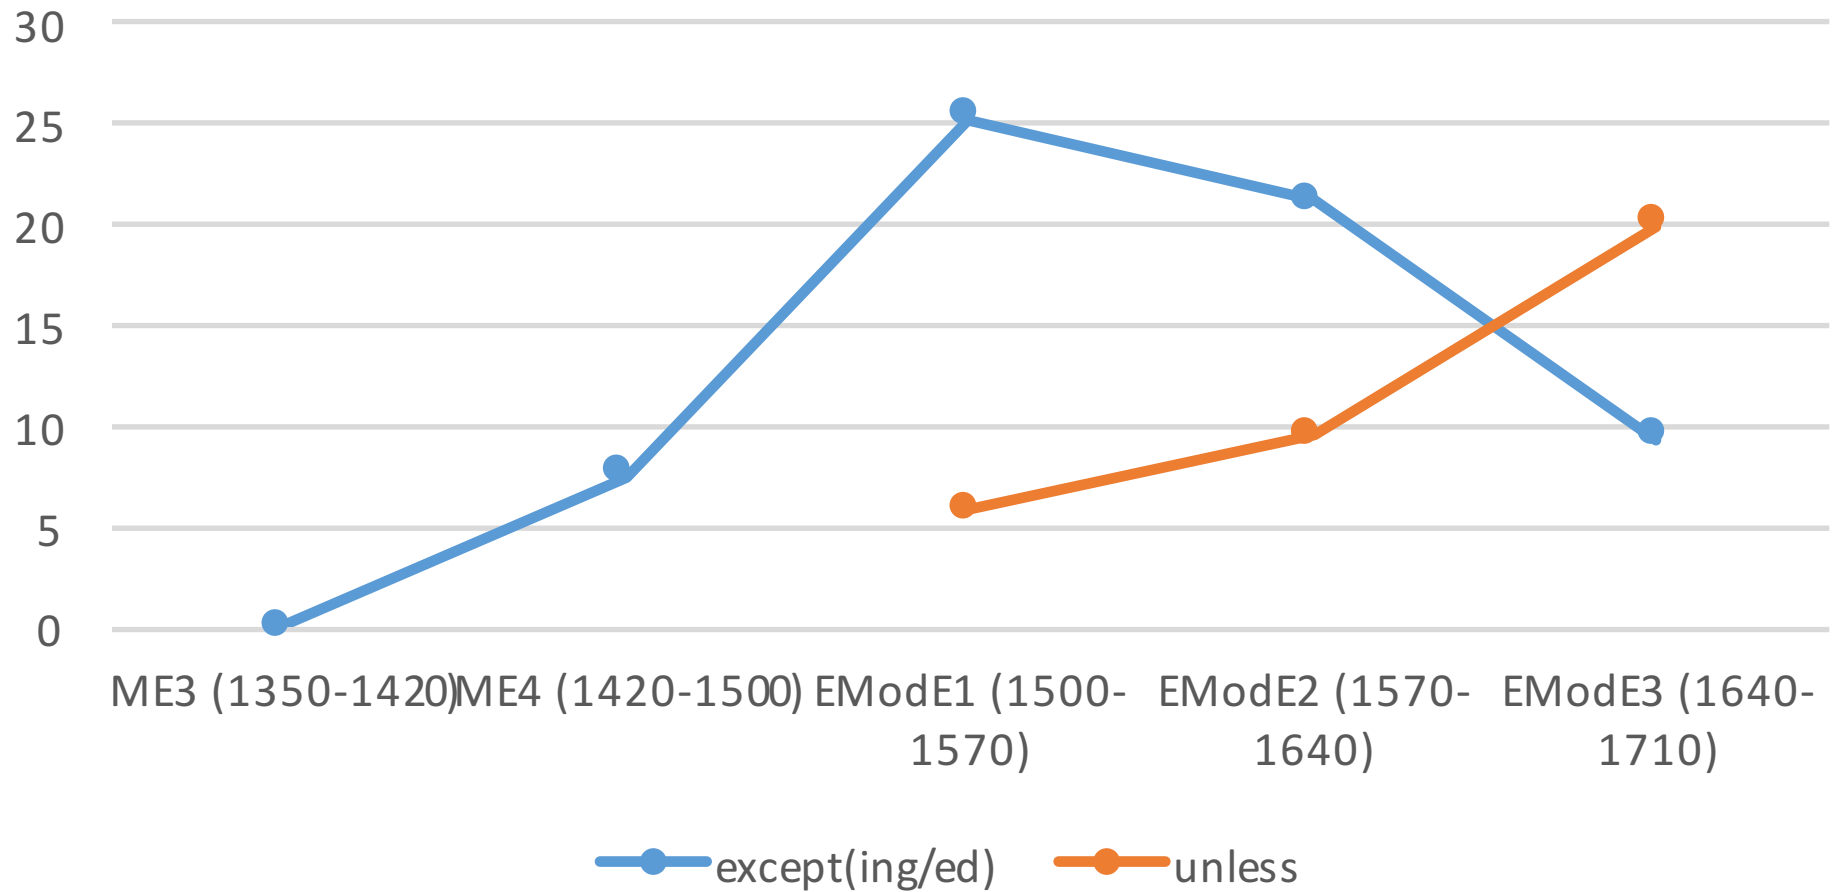

Some English connectives in the Helsinki Corpus, 1350–1710

CIVIL-WAR EFFECT?

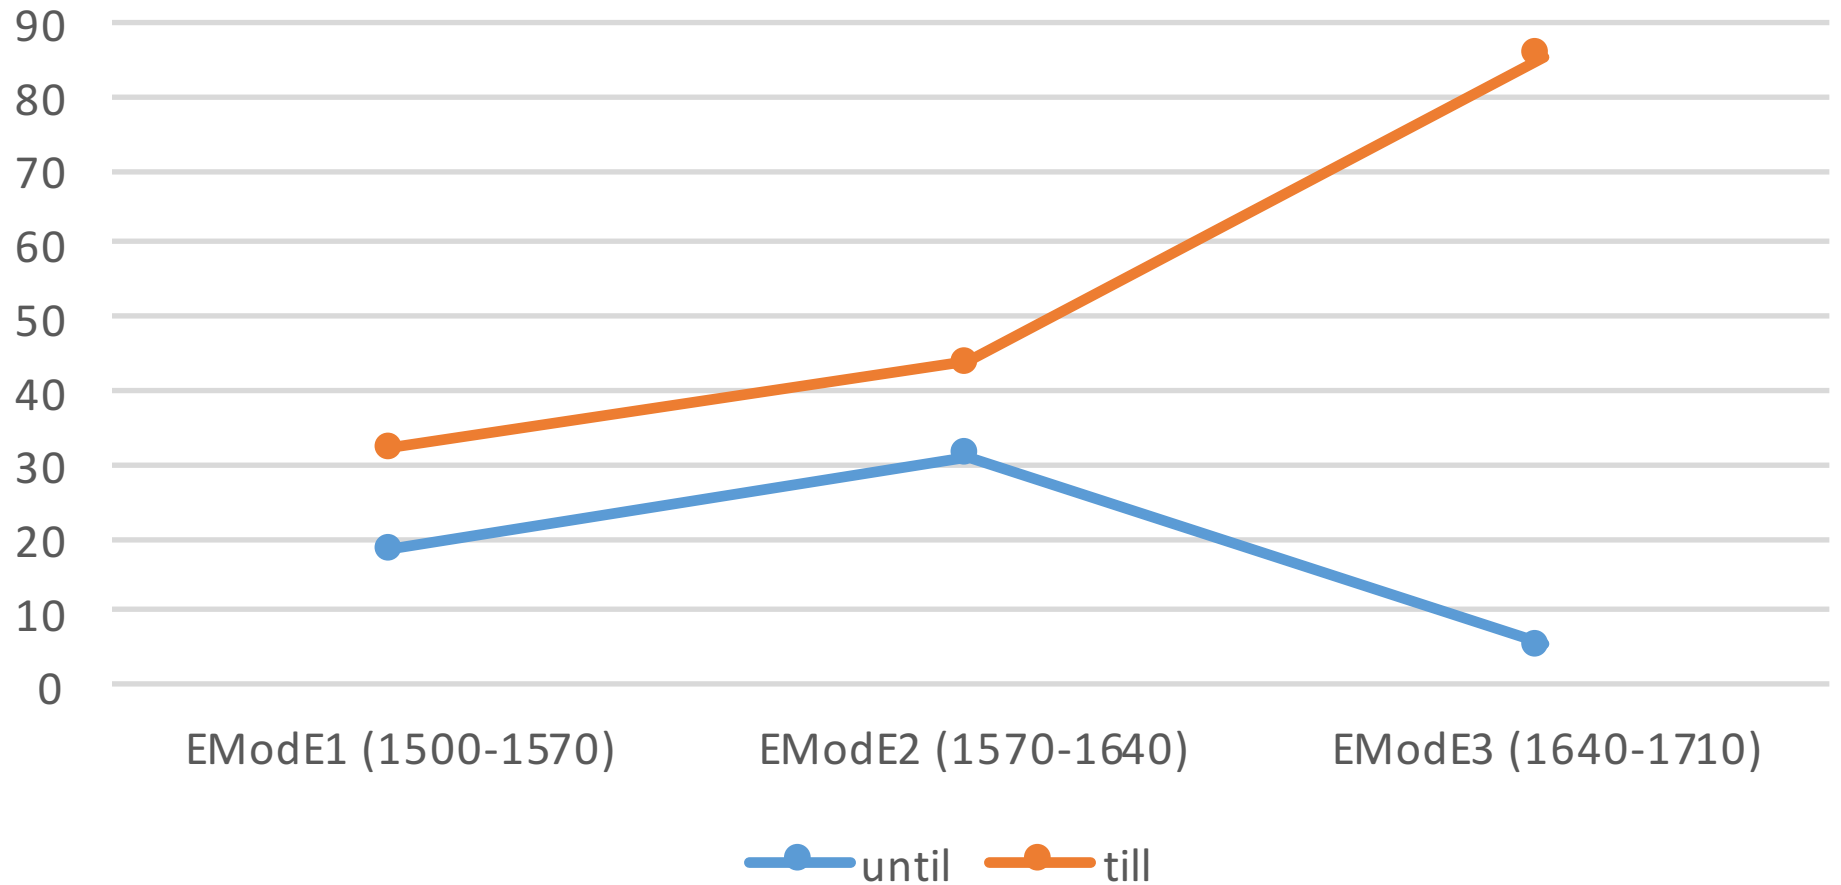

- save/saving
- notwithstanding
- until
- except(ing/ed)
- considering grammaticalized
- till
- unless
- according
- accord
- (in) (de)spite (of)

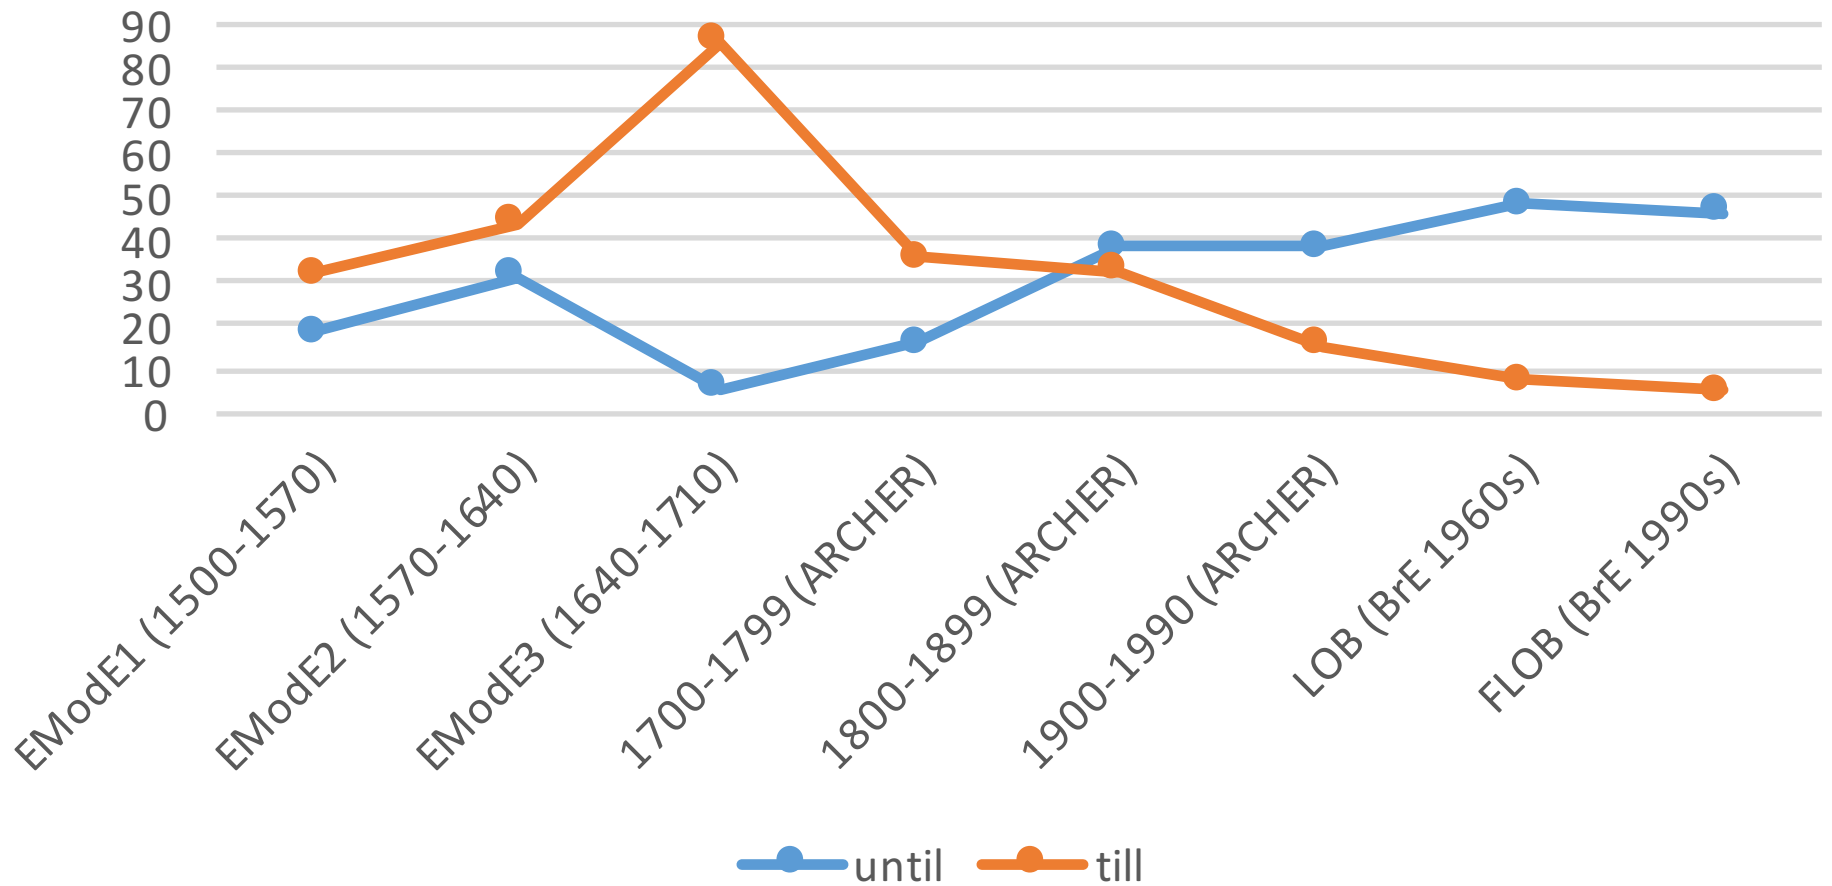

except and unless, ME–EModE

until and *till*, EModE

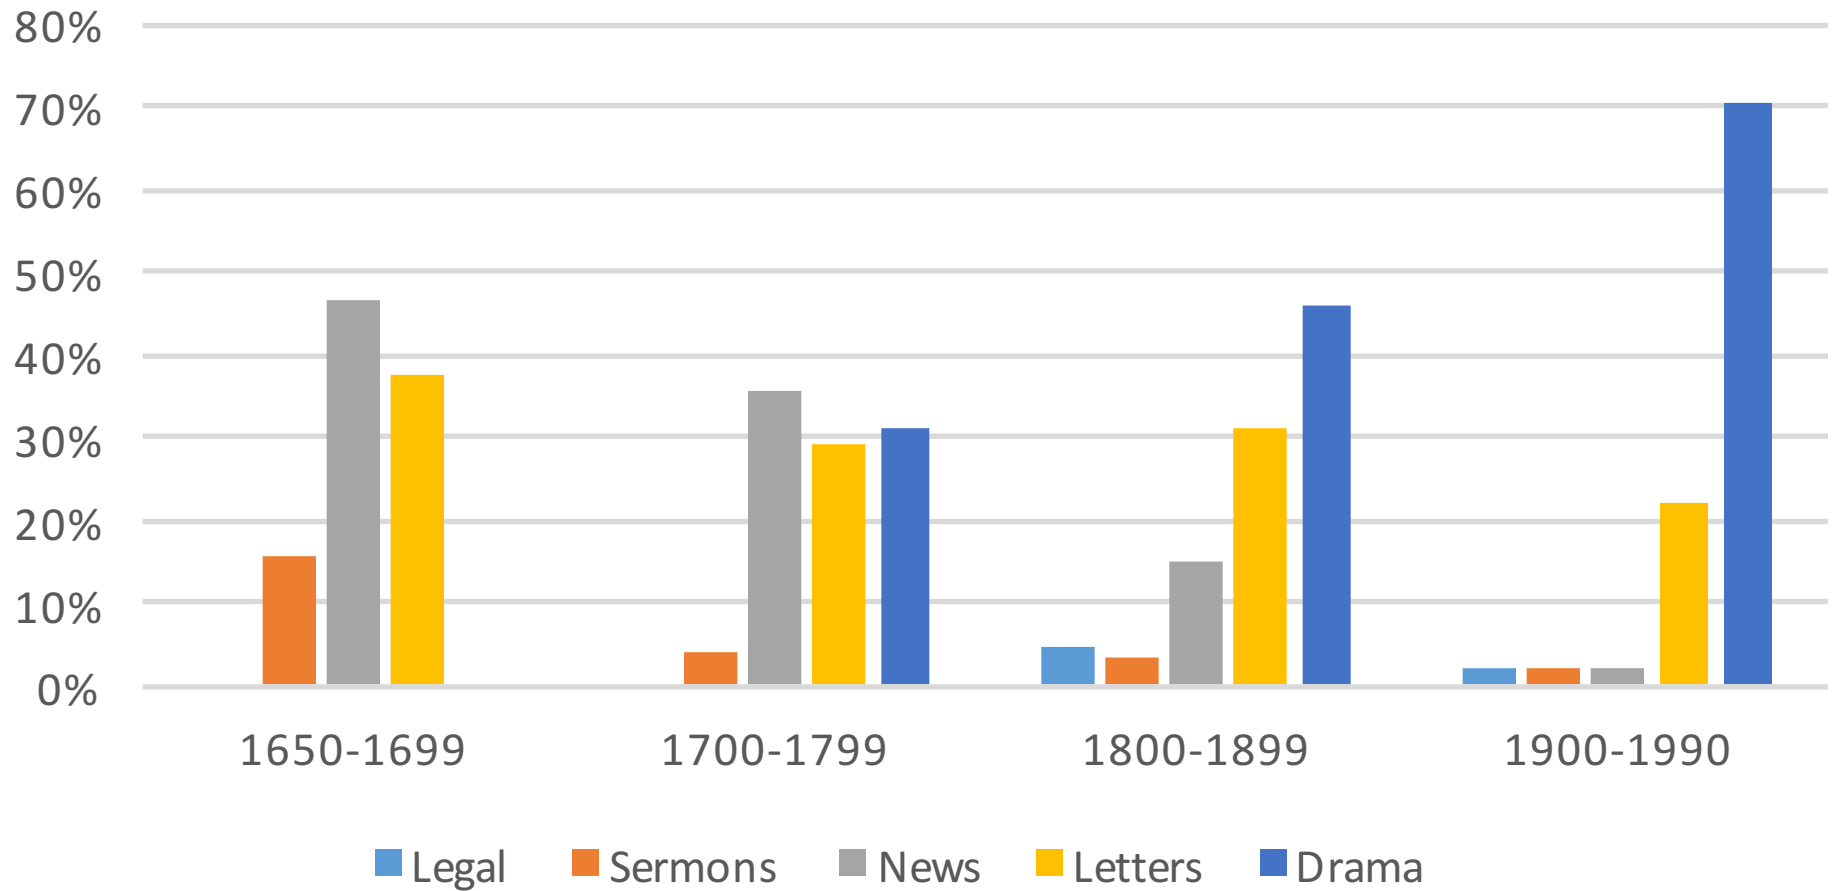

until and *till* in the long diachrony

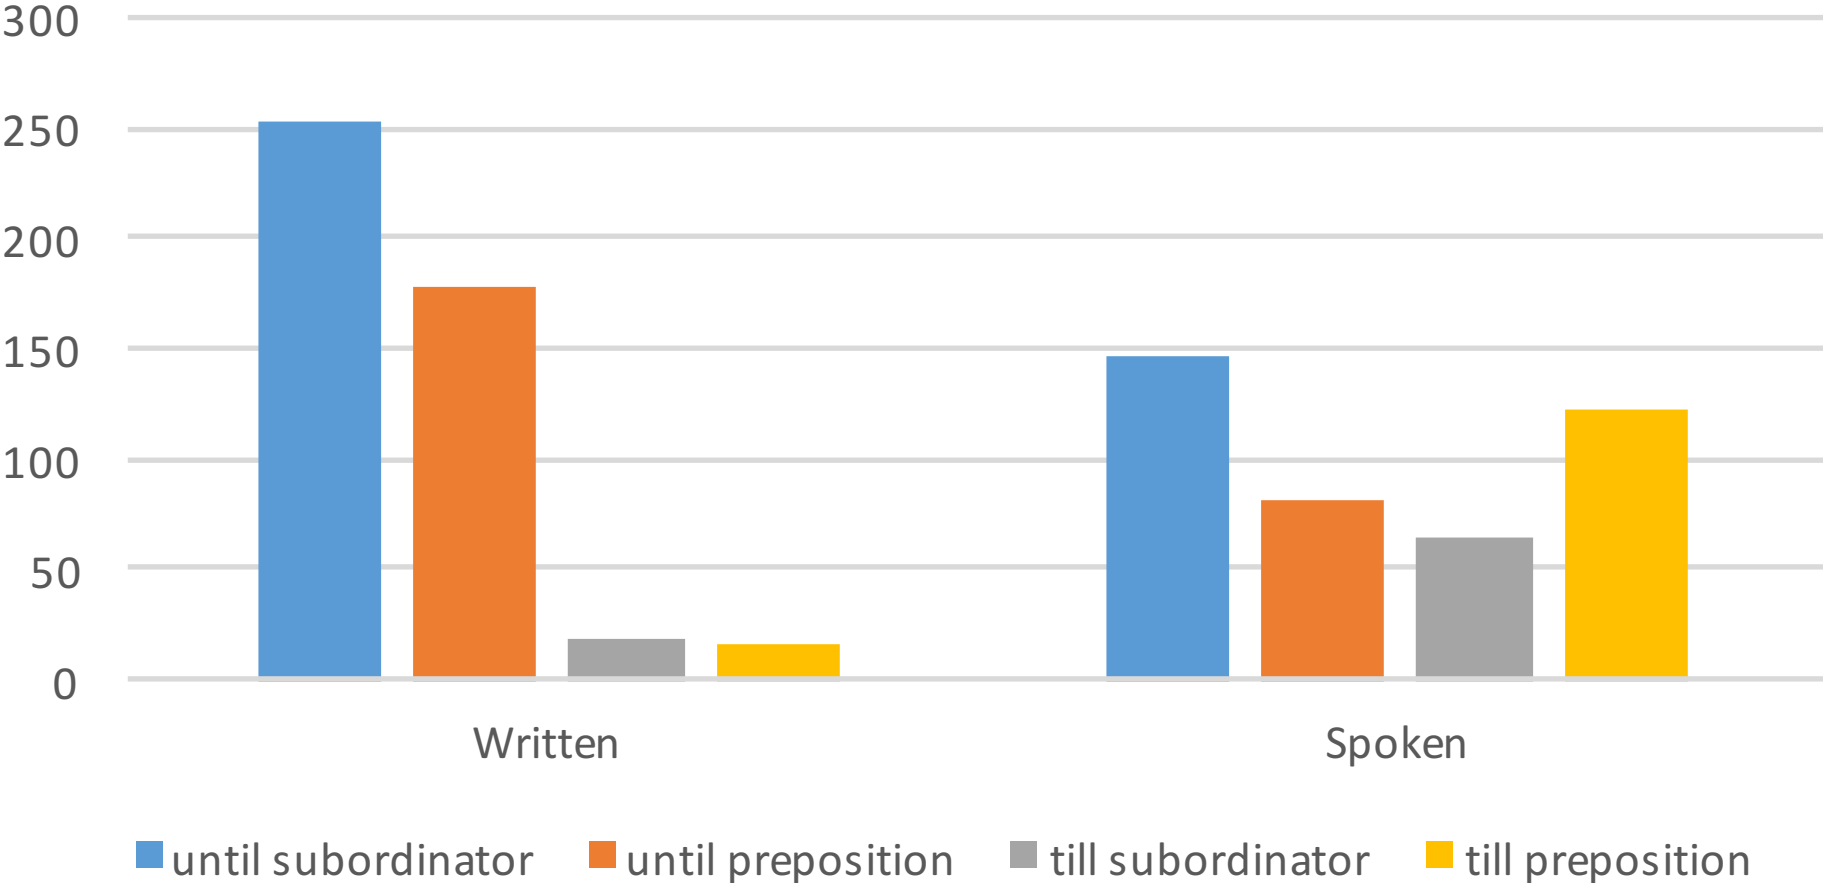

until in ARCHER

till in ARCHER

until and *till* in the BNC

CASE REVISITED: FUTURE WORKFLOW

From Excel to **machine-readable tabular data** (RDF Data Cube)

- Filter datasets
 - Grammar = Connectives or any narrower grammar concept
 - Expression = contains “unless”
- Possibility to automatically calculate normalised frequencies
 - Validate normalised frequency values against corpus details
- Query filtered dataset
 - Sum of frequencies
 - Group by time period
- Visualize

CONCLUSIONS (1)

- Workflow can be supported by one or more applications
- LCD works as common data source
- Proof-of-concept template for **storing and querying linguistic research data** for meta-analysis
 - Makes published research data ready for any kind of automated processing
 - Step towards re-usable research data

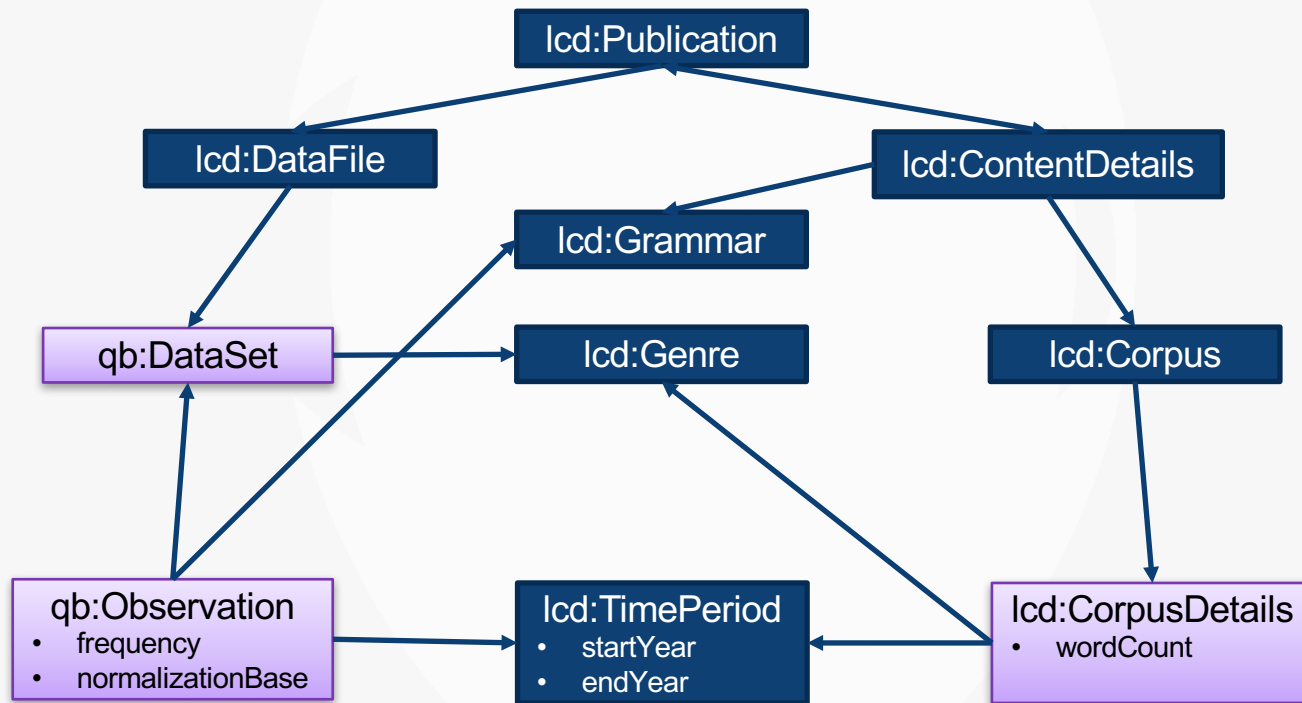

CONCLUSIONS (2)

- **Meta-analysis** possible at the level of:
 - Individual researchers
 - Linguistic topics
 - Time periods
- **LCD**: useful tool even at this stage
 - Will be published as an **open access** online resource by the end of the project (2018)
 - Wiki-style: researchers will be able to input their own studies
 - See Nevalainen et al. (2016)
